Application No.: Amendment Date: 10/680,963

Reply to Office Action of: April 20, 2007

February 21, 2008

AMENDMENTS TO THE SPECIFICATION:

Please replace paragraph [0090] beginning at line 1 on page 27 with the following paragraph.

[0090] A lower eukaryotic host cell, when used herein in connection with glycosylation profiles, refers to any eukaryotic cell which ordinarily produces high mannose containing Nglycans, and thus is meant to include some animal or plant cells and most typical lower eukaryotic cells, including uni- and multicellular fungal and algal cells.
